

Important Information

As explained during your orientation and sale documentation, the manufacturers of some parts of your new recreation vehicle REQUIRE that you use their service facilities in order to obtain free warranty service.

They also require that you, the owner, take the vehicle to them and prevent us from transporting it for you. They have this policy so that you have face to face contact with their service personnel to avoid any miscommunication and to insure that the warranty work is completed properly and to your satisfaction.

Here is a listing of local service facilities for chassis, generator, and 110 volt air conditioning systems. This listing is for your convenience only and not a guarantee by Altmans as to their proficiency or customer service. The information on this sheet we believe to be accurate at the time we produced this sheet. From time to time, additional service centers are added and current ones stop performing motor home service. You can check our website for an updated sheet at www.altmans.com.
